Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team ID: SWTID-2026-6867 | Date: 03 October 2026
Purpose / Vision: To streamline standard laptop procurement by automating approval-based task creation and Hardware assignment using ServiceNow Flow Designer.

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

Primary customer
Employees who need a standard laptop for their work-related activities.

Secondary customer
IT Procurement / Hardware team members who process approved laptop requests and configure the laptops.

6. CUSTOMER CONSTRAINTS — CC

- Laptop requests need approval before configuration can begin.
- Employees depend on IT / procurement teams to process requests.
- Hardware team capacity may be limited.
- Manual task creation and assignment consume IT resources.
- Employees have limited control over internal procurement processing.
- Standard laptop requests must follow the organization's defined process.

5. AVAILABLE SOLUTIONS — AS

Existing / alternative solutions
Manual request processing and approval handling; manually creating configuration tasks; manually assigning tasks to the Hardware team; following up with IT / procurement for status.

Advantages
Familiar process; can be handled using existing IT procedures.

Limitations
Repeated manual effort; delayed task creation and assignment; higher chance of missed or delayed activities; less efficient as request volume grows.

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

- Employees need to request a standard laptop through the IT procurement process.
- Employees need the request to move through approval without unnecessary delay.
- IT teams need approved laptop requests to generate configuration tasks efficiently.
- Hardware team members need configuration tasks to be created and assigned correctly.
- Employees need the configured laptop to be ready without unnecessary manual processing delays.

9. PROBLEM ROOT CAUSE — RC

The root cause is the reliance on **manual processing** after a standard laptop request is submitted and approved. Creating and assigning the laptop configuration task can require manual intervention, which may introduce delays and additional effort for the IT / Hardware team.

The project addresses this root cause by using **ServiceNow Flow Designer** to automatically create and assign the Catalog Task after the request is approved.

7. BEHAVIOUR — BE

- Employee identifies the need for a standard laptop.
- Employee opens the ServiceNow Service Catalog.
- Employee submits the laptop request with the required details.
- Employee waits for approval.
- Employee checks the request status when necessary.
- IT / Hardware team reviews and processes the approved request.
- Hardware team configures the laptop and updates the task.
- Employee receives the configured laptop.

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS — TR

- Employee joins the organization and needs a laptop for work.
- Employee needs a standard laptop for a new role or work activity.
- Existing laptop is unavailable or needs replacement.
- Employee submits a standard laptop request in the Service Catalog.
- IT procurement receives a new laptop request to process.

4. EMOTIONS: BEFORE / AFTER — EM

- **BEFORE:** Employee is unsure how long the request will take and frustrated by delays; Hardware team is overloaded by repeated manual handling.
- **AFTER:** Smoother, more predictable request experience; approved request moves into configuration automatically; Hardware team gets a clearly assigned task and IT spends less manual effort.

10. YOUR SOLUTION — SL

ServiceNow Flow Designer automation for standard laptop procurement
Starts automatically after an approved standard laptop request:

1. Triggers the Flow Designer process.
2. Creates a Catalog Task.
3. Includes the required laptop configuration information.
4. Assigns the task to the Hardware group.
5. Allows the Hardware team to configure the laptop.
6. Supports completion of the laptop procurement process.

Main benefit
Reduces manual task creation and assignment effort and gives a smoother standard laptop procurement process.

8. CHANNELS of BEHAVIOUR — CH

8.1 ONLINE

- ServiceNow Service Catalog
- ServiceNow request / status information
- ServiceNow approval process
- ServiceNow Catalog Task

8.2 OFFLINE

- Employee communicates with the IT / procurement team when required.
- Hardware team physically configures the laptop.
- Hardware team prepares the laptop for delivery.
- Employee receives the configured laptop.
